Hi Curtis,

Thanks again for facilitating the interview with Brad and Ben this morning. I meant to ask them this question while I had them on the phone but forgot about it. I just emailed Ben about it too.

Since you all are coming to St. Louis on Monday, will you have time to come to the station and sit down with our host Jamie Allman on set to talk about this? If so, we can have you all come here around Noon and tape the segment which will take about half or so. Let me know, because producers are always looking for guests to talk with Jamie.

Let me know. Thanks so much!

Aisha

Aisha,

Here is the conference line for the 10:00 a.m. Tuesday phoner with Brad Vann, who is EPA's project manager for the West Lake Landfill.

Ex. 6 - Personal Privacy

Call me directly if you have technical challenges: 913-551-7506.

Best,

Curtis

Subject: Aisha from ABC 30

Hi Ben and Curtis,

Reporter Aisha Khan here from ABC 30 in St. Louis. I am following the story regarding the Bridgeton and West Lake landfills today and wanted to reach out to your agency for a statement. I understand the EPA is disputing reports that warn of an elevated threat regarding fire smoldering over the landfill. Can you maybe provide some more information regarding some of the following questions?

1. The EPA released a report conducted by a division of the U.S. Department of Health and Human Services (HHS), what was in that report as far as contamination in the West Lake Landfill is concerned?
2. The AG's office released reports indicating the underground fire was moving toward the radioactively contaminated West Lake Landfill and that some of the contamination was found in vegetation and ground water outside of the federally regulated Superfund site. What is the EPA saying about that report?
3. Does that groundwater pose a risk to spreading contamination from West Lake?
4. Does the EPA have any reason to believe that the fire was moving towards West Lake?

Thanks so much for any information you can help provide.

Aisha Khan
